

MODEL NO:

iQ000

JEM

Main Features

- **Small Size :-**
48cm x 24cm (19" x 9")
3290g (7lb 4oz)
- **Quiet :-**
Has not developed the requirement to enter Crying mode unless absolutely necessary.
- **Requires feeding regularly :-**
Drinks breast milk several times a day.
- **Regular Outputs :-**
Jem produces lots of regular outputs in many different forms (e.g. sonic, liquid, black tar like substance, etc.)
- **Several Operating Modes :-**
(Sleep Mode, Idle Mode, Crying Mode, Eating Mode, Playing Mode)
Jem reacts to his environment changing operating mode automatically to suit.
- **Motion Sensor :-**
Jem has a built in movement sensor which usually (if we're lucky) changes his operating mode to sleeping mode
- **Cost:-**
Will cost lots to run over his lifetime, but will be worth every penny.

Announcing: Dar & Carolyn's No 1 Son

After one night of "brainstorming", followed by nine months of production, Q Electronics Ltd, and more specifically Dar and Carolyn have successfully produced their first child – Jem Shivtiel.

Jem was born on 12th November 1999 at 07:58 and was 3 days late – a trait that we believe he gets from his father. He weighed 7lb 4oz (3290g in new money), "a nice size" we've been told.

Jem is lovely, a good looking baby – a trait he definitely must get from his mother – and has, so far, proven to be as good as gold, maintaining a cool composure even when things are tough (e.g. during labour).

He likes regular feeding, sleeping and being cuddled, and shows his appreciation by producing outputs – both in sonic form and in his nappies.

Jem is absolutely gorgeous, and will be spoilt rotten by his mother, father and the rest of the family.

More pictures of him can be seen at: www.shivtiel.co.uk
and Email messages can be sent to: jem@shivtiel.co.uk.

Model iQ000 Jem – in his "sleep mode"

Introduction

The Model iQ000 Jem is a small and quiet baby requiring constant attention and regular feeding.

Born on 12th November 1999, at 7:58 in the morning, Jem had kept his parents up all night, before deciding that it was time to show up.

During the production process, Jem wriggled a lot and made his mother’s tummy move regularly (in a similar fashion to the Alien in the film Alien!)

Simple Operation

Jem is very user friendly, and enters most operating modes automatically, however a bi-product of this simplicity of operation is that at random intervals (usually, but not necessarily following Eating Mode), Jem produces outputs of differing nature. Some of these outputs require disposal very quickly, or else Crying mode is entered into and people in the same room sense a funny smell.

Power Supply

Breast Milk is all that is required to power Jem, with one dose able to last about four

hours – although this time is also variable. Jem, however, has a “low battery” audible warning – also called Crying Mode.

Parental Spoiling

Both his parents and his entire family, who are all very proud of this miniature miracle, are already spoiling Jem completely. This may not be helpful to his future discipline, but cannot be helped!

The Future

We all look forward to the next 18 years and more, and hope that when Jem grows up, he will be “healthy, wealthy and wise” and will be in able to look after his parents in their old age!

Technical Specification

Operating Modes

- Sleep Mode – to conserve power Jem spends most of his time asleep
- Idle Mode – Most regular operating mode when not in sleep mode.
- Crying Mode – an alarm mode indicating that Jem is not satisfied.
- Eating Mode – Jem requires entry into Eating mode every four hours or so otherwise Crying Mode is activated more frequently than necessary.
- Play Mode – This mode will be developed over time.

[in all operating modes a black tar like substance, along with a yellow liquid may be produced (see outputs) which needs to be contained and cleaned up regularly, nappies will need to be purchased for this task]

Inputs

- 1 Mouth for eating (and screaming – see Outputs)
- 2 eyes (currently blue, but expected to change)
- 2 ears (little)

Outputs

- 1 Mouth for screaming, dribbling, and burping
- 1 Lower Hole for poo poos – Black tar-like substance
- 1 external connection – Yellow Liquid

Size 48 x 24 cms (19” x 9”)

Weight 3290g (7lb 4oz)

Unit Case Skin Colour

Included Accessories

Selection of babygrows, cardigans, booties, socks, gloves, hats, shorts, t- shirts, pram, cot, baby seat, carrying basket.
